Carpet

Ohio Desk offers a full array of commercial carpet representing major mills in virtually all categories. In addition, Ohio Desk has joined forces with Milliken to offer our clients a modular flooring system that delivers total flexibility.

• Installation

Modular carpet is easy to transport, setup, install, and remove. The Furniture Lift System actually raises systems furniture just enough to remove existing broadloom carpet and allow for easy installation of carpet tiles. This method greatly reduces downtime, disruption and cost.

• Millitron

Milliken's state of the art computer design process creates the world's highest level of flexibility in design and texture. These patterns allow for superior soil hiding and mask traffic patterns.

• Comfort Plus

Comfort Plus is an exclusive backing that increases comfort, provides a moisture barrier, doubles the life of your carpet and reduces noise. It retains its cushioning action in hot and cold extremes, and conceals sub floor irregularities.

• Environment

Your flooring investment is protected with our Earth Square program. This process allows your old carpet to be super cleaned, rejuvenated, restyled and reinstalled for only half the cost of new carpeting with a new warranty included.

Cleaning

Ohio Desk will analyze your facility to proactively develop a carpet maintenance program tailored to your facilities needs.

Other Flooring

We also provide many other types of flooring, including:

- wood
- vinyl & rubber
- ceramic
- raised access flooring
- static dissipative flooring
- marble

We have a team of experts to assist you in your flooring selection process!
