

Visual Work Tools

We offer a wide variety of visual communication tools that enhance the way employees collaborate and communicate. Here are just a few ways we can assist you:

eno™ Classic Interactive Whiteboards

eno interactive whiteboards are designed as "walk up and use" appliances with no complicated setup or software to learn and no cables to manage. With eno, the presenter is able to go beyond simply displaying content by being able to interact with whatever digital content is on screen...advance a presentation, navigate a webpage, etc. And beyond interaction, a user can markup that content by making notes or highlights in virtual ink that can then be saved or printed. Finally, unlike the technology of prior generations, eno is based on Steelcase's industry leading "ceramicsteel" surface, so now your interactive whiteboard can also be written on with dry erase pens with no risk of marring the surface. Do more with less...fewer cords, less power, less installation, less "stuff." Just simpler and faster communication.

Walk-and-Talk™ Interactive Whiteboards

Walk-and-Talk interactive whiteboards are designed as "walk up and use" appliances with no complicated setup or software to learn. The presenter is able to go beyond simply displaying content to allowing for that content to be marked up and then saved or printed, greatly increasing the speed and efficiency of your collaboration.

CopyCam™ Image Capturing System

For use with a traditional whiteboard, CopyCam's user-friendly, one-touch process saves time, eliminates the problem of recalling meeting content, and increases productivity. Simply take notes and sketch the way you would on any standard whiteboard. With the press of a button, the contents of a board are either printed, saved to a flash drive, or saved to the internal web server.

RoomWizard™ Room Scheduling System

A web-based scheduling system that lets you reserve meeting rooms centrally. Information is displayed on state-of-the-art digital screens posted outside meeting rooms. Features a highly customizable interface and the ability to integrate with either Microsoft Exchange/Outlook or Lotus Notes. The RoomWizard also has the ability to query a connected CopyCam and automatically distribute any images captured during a completed meeting.

media:scape™

Integrating furniture and technology, media:scape is reshaping the way people collaborate in a networked world. Most collaborative work spaces today support leader-led presentations where information is controlled and shared by one person at a time. media:scape removes these barriers and democratizes how people access and share information by allowing all participants to contribute their ideas – quickly and seamlessly.

Traditional Whiteboards

Available in a variety of sizes and frame materials, they are made with environmental responsibility in mind: safe, clean, and 99.9% recyclable.

We can also support our customers with all of their general Audio Visual needs, whether it be customized conference tables, screens, LCD monitors and projectors or other AV requirements.
